1 INTRODUCTION

1.1 DECLARATION OF PECUNIARY INTERESTS, SIGNIFICANT NON-PECUNIARY INTERESTS AND LESS THAN SIGNIFICANT NON-PECUNIARY INTERESTS

The provisions of Chapter 14 of the Local Government Act, 1993 (the Act) regulate the way in which Councillors and designated staff of Council conduct themselves to ensure that there is no conflict between their private interests and their public role.

The Act prescribes that where a member of Council (or a Committee of Council) has a direct or indirect financial (pecuniary) interest in a matter to be considered at a meeting of the Council (or Committee), that interest must be disclosed as soon as practicable after the start of the meeting and the reasons given for declaring such interest.

As members are aware, the provisions of the Local Government Act restrict any member who has declared a pecuniary interest in any matter from participating in the discussion or voting on that matter, and requires that member to vacate the Chamber.

Council's Code of Conduct provides that if members have a non-pecuniary conflict of interest, the nature of the conflict must be disclosed. The Code of Conduct also provides for a number of ways in which a member may manage non pecuniary conflicts of interest.

RECOMMENDATION

It is recommended that Committee Members now disclose any conflicts of interest in matters under consideration by the Infrastructure Policy Committee at this meeting.

For attention of Police if not already aware.

National Driver Fatigue Week – 21-27 February 2024

- Orange and Cabonne Road Safety put in for a grant with the National Heavy Vehicle Regulator, to promote driver fatigue strategies. Orange Council's particular strategy, prepared by Andrea Hamilton-Vaughan, is based on the internationally recognised intervention strategy Power Nap.

- The QLD government contacted Andrea and advised they will be promoting Driver Fatigue Week. They will be using Andrea's work and commended Orange and Cabonne Council's for their support of road safety.
- Andrea received a letter from the Transport CEO in SA – they are promoting National Driver Fatigue Week but have also asked if Andrea could collaborate in the future in working on heavy vehicle rest areas and driver fatigue. They will support national driver fatigue week and distribute the power nap communications toolkit of free resources and their own fatigue related materials.
- Andrea also received an email from Transport Accident Commission of Victoria commending Council on work done.
- TfNSW has decided to join National Driver Fatigue Week.
- There is a Road Safety Forum coming up on 22 February 2024. Andrea received invitation to attend.

Total	0.58	0.00	2.54	26.15

* Bores include two at Clifton Grove and two at the Showground/Margaret Street

A more detailed monthly summary of raw water transfers can be found on Council's website at <https://www.orange.nsw.gov.au/water/oranges-water-supply/>.

The second quarter Decision Support Tool (DST) predicted dry conditions from the Bureau of Meteorology's POAMA forecast. Suma Park Dam remains above 90%, although modelling has predicted the dam may fall below this point at the end of February 2024. There are no changes to operating conditions required at this point, however plans are underway to have the additional raw water supply systems ready if required. The next quarterly DST will be reported in April.

Macquarie River Flows

The mean daily flows in the Macquarie River monitored downstream of Long Point (Station 421192) for 23 January to 20 February 2024 are presented below.

Flow rates were below the extraction trigger value of 108 ML/d for four days for the period, with a minimum daily flow rate of approximately 85 ML on 5 February 2024. The maximum daily flow rate reported was approximately 949 ML/d on 10 February 2024.

The data for the chart below was sourced from the WaterNSW website with flows presented in megalitres per day (ML/d).

3.1 Current Works

Demand Management

Residential water use

Permanent Water Saving Standards came into effect on Friday 25 June 2021. Average daily residential water consumption for the period 19 January 2024 to 15 February 2024 was 184 litres per person per day. The graph below shows the average daily residential water consumption trend since February 2023.

Total water use

The average daily city-wide water consumption for the period 19 January 2024 to 15 February 2024 was 11.9 ML/day.

3.1 Current Works

DRINKING WATER QUALITY

Water samples are collected as a component of Orange City Council's Drinking Water Quality Monitoring Program in accordance with NSW Health requirements. Samples are collected regularly and sent to the NSW Government National Association of Testing Authorities (NATA) accredited laboratory for analysis. Water quality for January 2024 complied with the Australian Drinking Water Guidelines health targets.

OTHER MAJOR PROJECTS

Euchareena Road Resource Recovery Centre

This project will see the construction of a new waste cell and the capping of stages 1 and 2.

The Contractor has commenced preliminary site establishment works while their construction and environmental plans are reviewed and approved by the DPIH prior to commencing contract works. This approval is expected in the next few weeks.

Lake Canobolas Water and Sewer

Both the water and sewer mains have been pressure tested and the water main disinfected. There are a number of non-conformance issues that have been brought to the contractor's attention which will need to be corrected prior to the commissioning of the pipelines. A meeting was held with the contractor on 21 February 2024 where the resolution options were discussed to expedite the completion of this project.

East Orange Harvesting Wetlands

(Blackman's Swamp Creek Stormwater Harvesting Stage 2)

This project when completed will provide an offline storage on Blackman's Swamp Creek to increase the city's water supply secure yield from stormwater harvesting.

Following an amendment to the Water Sharing Plan for the Macquarie Bogan Unregulated and Alluvial Water Sources 2012 in 2022, allowing local water utilities to construct dams and weirs, Council resubmitted an application for a Water Supply Works Approval. This amendment opened up a pathway for approval of the project.

The application was advertised in the Summer of 2022/23. 58 submissions were received by the then DPE-Water Approvals Team. Council has had the opportunity to provide responses on the submissions to the approvals team. Following which they requested further investigations of riffle surveys, eDNA surveys and flow modelling which was subsequently provided as requested in November 2023.

In January 2024 the former Department of Planning and Environment was restructured into two departments and Water now sits in the Department of Climate Change, Energy, Environment and Water (DCCEEW). The approvals team is unchanged, and they gave a verbal update in January that Council have provided adequate information for the assessment process and the assessment is progressing. The approvals team in February have reconfirmed previous advice that a section 60 approval is not relevant and are continuing with the assessment of the Water Supply Works Approval. At this stage it is still too early to give a definitive date for completion of the assessment.

3.1 Current Works

Sewage Treatment Plant Inlet Works

This project involves upgrading the existing inlet works at the Orange Sewage Treatment Plant (STP) to meet the peak wet weather flow demand and replace the old inlet system with improved screening and improved contingency measures. The proposed works involve excavation of the construction area, relocation of two inlet sewer pipelines, water main and internal STP access road and installation of a retaining wall adjacent to the new inlet works. New inlet work structures include screening channels, grit trap, pump station and flow splitter and associated connection piping, electrical cabling, screens, grit trap, washing equipment and pumps.

The previous issues surrounding rock have been resolved and the Contractor is moving forward with this project. The current expected completion date for the STP upgrade works is late May 2024

Southern Feeder Road Stage 4

As previously reported significant unsuitable material and wet foundation conditions have initially hampered the Contractor's progress. To address this, lime stabilisation of the road has occurred, and rock drainage mattresses had been constructed where ground conditions are very poor. It is anticipated that additional lime stabilisation will be required.

The contractor has completed the initially discovered Naturally Occurring Asbestos (NOA) removal by placing it into the large fill area adjacent to Rifle Range Creek. Subsequently additional asbestos has been discovered and Council is working with the contractor to see its removal in an efficient cost-effective manner.

AIRPORT PASSENGER NUMBERS

Passenger numbers during January 2024 were 5,428 compared to 5,268 in the same month in 2023.

These figures include passenger numbers from Regional Express, Link Airways (formerly Fly Corporate) and QantasLink.
